

# Train the Trainer Program

Need to train your teams on how to get the most from your Domo investment? Leverage Domo University's Train the Trainer program to access best practices, content, and ongoing expert support.

## What is Train the Trainer?

Our Train the Trainer Program gives customers the ability to scale Domo University technical and user product training to a large employee base. By leveraging our content and best practices, you can create your own Domo Center of Excellence and offer ongoing training as needed. The Train the Trainer Program offers access to Domo University curricula for training only your internal teams, and it may not be used, sold, or made available to any other entities.

## What does the program include?

This program offers several levels of engagement to meet your Domo needs. All Domo University content and best practices below are free; only direct one-on-one Mentoring services will result in any fees:

- » Facilitator guides
- » Presentation materials
- » Student guides
- » Data sets for labs
- » Train the Trainer Best Practices guides
- » One-on-One Mentoring with Domo University expert (\$)

## What does the program cost?

Domo University course materials are free. Aspiring trainers should ideally attend the Domo course they would like to learn how to teach at a daily rate of \$650 for each course. If ongoing Mentoring is desired, an hourly Consulting fee will be charged via an SO.

## How do I begin?

- Reach out to Mark Willder to begin leveraging Domo University's award-winning training materials and best practices.
